

CARA goes on easily.

- Loosen both clips from the mask.
- Pull the headgear over your head.
- Fasten the lower clips on the mask.
- Adjust the upper portion of the headgear so that it is as loose as possible and as tight as necessary.
- Adjust the lower portion of the headgear the same way so that it is as loose as possible and as tight as necessary.

Two sizes – one decision

The first impression has staying power. The mask cushion is soft and supple. It adapts ideally to the contours of any nose and makes a forehead cushion obsolete.

You choose from just two different sizes which can be placed on the same mask frame. The standard cushion in S/M fits about 65 percent of patients. Use size M/L for larger noses.

Sensational silence

The exhalation system near the ball-and-socket joint has proven itself over the years. Now we've managed to make it leaner and quieter.

We have kept the gaps which create a diffuse flow of air that does not disturb patient or bedmate and the upper closed portion that stops air from flowing toward patient's eyes. CARA is so quiet that even the ticking of a clock is louder.

CARA goes green

CARA also considers its environmental impact. Not only are few materials used, but everything is recyclable and the headgear is certified by OEKO-TEX STANDARD 100.

Bank on the best

The ball-and-socket joint turns 360° in 3D to give the patient unlimited freedom of movement throughout the night while CARA remains securely in place.

Details that make life easier

The mask cushion can be positioned on the mask frame only in the right way.

The headgear too allows only proper handling. The teal-colored area is always on top and the headgear is easily fastened with EasyGrab.

CARA cares for you.

Time-consuming mask fittings are history. Simple use is in greater demand than ever. Does that sound familiar?

Masks from Löwenstein Medical Technology have made fittings easy for you for many years. With CARA we have gone one step further, perfecting the proven advantages in a thoroughly modern way.

The lightweight CARA mask features a softly supple cushion with exact fit, a quiet, diffuse exhalation system and other details that make life easier.

The advantages of CARA

- Soft, supple mask cushion in two sizes only
- Lightweight at only 59 grams
- Small, quiet and diffuse exhalation system **1**
- Color-coded headgear with intuitively used clips and EasyGrab **2**
- Ball-and-socket joint for freedom of movement **3**
- Extremely durable material
